# How to Install the Wall Mounted Refrigeration Unit?

- The monoblock refrigeration unit is mounted on the wall panel of the cold room or freezer room.
- Prepare a opening with suitable dimensions in the cold room wall panel.
- The **a** and **b** is the opening dimension.
- Position the unit onto the cold room wall inserting the evaporator section in the opening.
- Fix the unit using the mushroom-head screws supplied.
-

(Unit: mm)

| Model | A | B | C | D | E | a | b | c | d | e | f | g |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| GL-BYTCN10EL | 600 | 710 | 350 | 360 | 630 | 440 | 390 | 450 | 400 | 60 | 169 | 275 |
| GL-BYTCN20EL | 720 | 920 | 400 | 410 | 770 | 620 | 450 | 595 | 460 | 65 | 230 | 330 |
| GL-BYTCN30EL | 920 | 950 | 450 | 410 | 770 | 790 | 450 | 605 | 650 | 65 | 325 | 330 |
| GL-BYTCN40EL | 1020 | 950 | 470 | 460 | 770 | 880 | 460 | 705 | 760 | 65 | 380 | 330 |

## Pay Attention:

1. **It is recommended to install the monoblock refrigeration unit away from the door.**
2. **Make sure there is no obstruction at the condenser outlet and the heat dissipation is good.**
3. **Reduce the number of times the cold storage door is opened and closed.**
